Pisco Wall

A further 200m up the hill from False Prophets is Pisco Wall where Alto Del Carmen can be found.

19 Alto Del Carmen 20 30m 2b double rack to #2

An engaging route established group-up on amazing compact schist. To protect the initial run out, place a cam in the large flake at your feet and reach high to a #0.3 slot on the climbers left. Bring long slings to prevent rope drag below the roof.

South West Face between points 2258 and 2080 above Lake Hope

20 Giardia Chronicles 16 200m double rack with single #4
Mason Gardener and Reon Morrison Feb 2026

North East Face between points 2258 and 2080 above Lake Hope

21 Grip, Rip and Slip 20 100m double rack with single #4

NE side of unnamed peak is on immaculate glaciated schist. Climb up easy slabs to gain a splitter horizontal crack, step onto ramp being delicate with your feet. Turn the crack into easier terrain then follow lower quality rock to a belay at base of overhanging OW. Potential to climb this line. Otherwise move left around a corner up easier terrain. Plenty of potential for moderate routes on this face.
